

BARTLETT FOR ND SENATE - THE CONSERVATIVE VOTE

Endorsed by The National Republican Liberty Caucus to strengthen free markets, preserve individual rights, and limit government.

- ★ **Limited Government** North Dakota government is too big and growing too fast. State government should be limited to protecting people from bad people and bad government, not changing the way people live or redistributing their wealth to serve liberal agendas.
- ★ **Property Taxes** Property taxes should be cut drastically by creative local decisions, not by stealing money from others using the force of state law. Property taxes are immoral because, when not paid, they transfer private property to the government.
- ★ **Personal and Corporate Taxes** Collecting more personal and corporate income taxes than necessary is legalized robbery and undermines the productivity of businesses, liberty of individuals, and the effectiveness of charities. Stop taxing productivity and North Dakota will attract and see an increase in productive individuals and businesses.
- ★ **Economic Development** Government meddling in economic development is a socialist trend, which always fails. It fails because business owners are hamstrung by non-productive government regulations, taxes and timing to pay for those regulations. A free market will always produce the safest, highest quality products at the lowest price.
- ★ **Life** I hold the sanctity of life position, which does not allow abortions or euthanasia under any circumstances. Life begins at conception and to purposely end a life is murder. Quality of life advocates use rape, incest, and mother's quality of life as excuses for murder.
- ★ **K-12 Education** The ND Constitution requires that public schools produce students with a high degree of intelligence, patriotism, integrity, and morality. Replacing NCLB with those goals, reaffirming the right of teachers to speak their religious convictions, and using private school budget models, would reduce regulatory burdens and drop property taxes by 40%.

Vote for me on November 4th if you...

...want to have fewer regulations, protect your liberties, eliminate property taxes, eliminate personal and corporate income taxes, handle economic development yourself, understand that life is sacred, or want truth and morality back in the schools.

Paid for by my friends who...

...understand limited government, know that property taxes are immoral, watch income taxes reduce productivity, are doing economic development without tax money, want to protect life, and desire local family control of education. **Website:** BartlettNDsenate.us

BARTLETT FOR ND SENATE - A GOOD REASON TO VOTE

Endorsed by The National Republican Liberty Caucus to strengthen free markets, preserve individual rights, and limit government.

- ★ **University Education** North Dakota colleges could serve people better if the radical agendas were exposed to public scrutiny. Agendas such as Marxism, gay rights, feminism, Darwinism, immorality, and globalism undermine our constitutional goals of intelligence, patriotism, integrity, and morality.
- ★ **Firearms** Defending and restoring gun rights is a freedom issue. George Washington called the Second Amendment, “liberty’s teeth.” The right of the people to keep and bear arms should not be infringed at all, under any circumstances. Current restrictions need to be repealed, for liberty.
- ★ **Free Market Agriculture** The good life of freedom and prosperity can return to farmers, ag businesses and the non-farmers. Lawmakers need to vote for bills which return free-market capitalism to agriculture and against bills which redistribute wealth and trap farmers and local communities in the downward spiral of socialism.
- ★ **The Surplus** The 1.2 billion surplus should not be spent, but returned to the productive taxpayers from whom it came. Spending it, now or later, increases the burden of government by stealing dollars from productive citizens. Saving it results in a loss from inflation.
- ★ **Healthcare** Healthcare reformers need to question the philosophy of socialism in medicine. Legislators need to protect the free market, which naturally results in the most diverse, highest quality, lowest price health care, because the consumer cares more about his health and budget than the government.
- ★ **Opposition** My opponent is 93% liberal, I am 100% conservative. He implemented socialism with your tax money against small business. I stand for much lower taxes, much smaller government, and a genuinely free market, where small businesses prosper. He is pro-abortion for three cases. I am against abortion for all cases.

Vote for me on November 4th if you...

...want to expose the radical agendas that are undermining families and communities in North Dakota, don't want any gun rights infringed, see the value of free market agriculture, desire to keep your money, and want less expensive healthcare alternatives. It is every citizen's solemn responsibility to choose between good and evil in political philosophies, on Tuesday November 4th.

Paid for by my friends who...

...went to North Dakota colleges, are armed, own farms, know how to manage money better than the government, are paying high medical bills and know that **bad politicians are elected by good conservative people who don't vote.** Website: BartlettNDsenate.us
